

LIFESTYLE

Alberta has a diverse arts and culture community, and numerous community and ethnic organizations that provide festivals, events and attractions for Albertans and out-of-province visitors. Alberta's major cities, Calgary and Edmonton, have vigorous live music, theatre and visual arts scenes, as well as symphony, opera and ballet. Smaller cities and towns offer unique cultural experiences with an array of festivals and opportunities to experience performing and visual arts.

Over 70 festivals bring music, dance, film, literature, theatre and the visual arts to Albertans throughout the province. Residents and visitors alike enjoy performances by 10 major performing arts companies, 45 professional performing arts companies and 155 performing arts organizations.

Alberta is home to five of Canada's 15 United Nations World Heritage Sites, areas designated by UNESCO as offering exceptional universal value to humanity.

INNOVATION

The new Alberta Innovates research and innovation system and the technology commercialization action plan make Alberta an attractive place for companies to accelerate innovations into the global marketplace.

The Alberta Innovates agencies are seeking solutions in priority areas of Health, Energy and the Environment, and Bio-industries. They are supported by R&D-focused information and communications technology, life science and nanotechnology organizations, and the new Technology Futures agency.

Alberta offers a supportive business climate with its Scientific Research and Experimental Development tax credit program, Innovation Vouchers program and the Alberta Enterprise Corporation to help attract venture capital investment. Alberta's Connector Service provides access to Alberta's research and innovation community at 1-877-828-0444 or connector@albertainnovates.ca.

COMPETITIVE ENVIRONMENT

Alberta's long-term economic growth prospects remain strong due to positive energy prices. Increased productivity growth will be important to optimize the economic benefits from energy investment in Alberta, and to encourage higher value added activity and industrial diversification. This is one of the reasons why the Alberta Competitiveness Act was initiated. The Act aims to coordinate the efforts of government and industry better, to ensure the province remains one of the most competitive jurisdictions in the world.

The Alberta government's low-tax and fiscal responsibility policies create long-term economic benefits for Albertans. Alberta has one of the most competitive business tax environments in North America. The combined federal/provincial corporate income tax rate is 25% in 2014. The low income tax rates combined with the fact that Alberta has no provincial capital taxes, no payroll taxes, no sales tax, and has a publicly funded health care insurance system makes Alberta's tax environment very competitive.

ALBERTA – FRESH OPPORTUNITIES

Alberta is blessed with an abundance of natural resources that form the foundation of its economy. The Alberta government has built on this foundation by fostering a positive business climate based on low taxation that attracts investment, creates diversity, and encourages Alberta businesses to compete successfully around the globe. This foundation includes:

- A globally competitive business tax environment
- An efficient and modern infrastructure
- Strategic access to the North American free trade market and to North Asian markets
- Political stability and low taxes
- A young, skilled and productive workforce
- The lowest overall personal taxes in Canada
- The best fiscal situation in the country
- A government that understands and works closely with business; and,
- Safe communities with a superior quality of life and diverse cultures

Alberta GDP by Industry 2013
Total GDP \$338.2 Billion
